

Annex G– Emergency Activities

The following chart outlines the five main activities that surround the management of Tier 1-5 emergencies.

Tier 1

Local Incident declaration not required.

Tier 2

Local Incident declaration not required.

Tier 3

Not applicable in the Chatham Islands.

Tier 4

State of Local Emergency and declaration is being considered or has been deemed necessary.

Tier 5

State of National Emergency and declaration is being considered or has been deemed necessary.

Function

There are five functions that relate to the well being of people during an emergency situation. Property/environment is added to the main three, as the loss tends to cause distress.

Activity

The key functions that are required to be managed under that activity. Some of the functions break down into a further subset of activities.

Provider

The main provider of the service or resource.

Agency

The agency that will ensure the function of that activity is being manage, either because of a legislative requirement or because they may be financially accountable. An Agency could also be an appointment.

The following chart provides the lead agency only for the management of resources and service provision; individual agencies need to address in their own plans a breakdown of their own chains of command and links to service/resource.

Function	Activity	Sub Activity	Provider	Agency (Tier 1-2)	Agency (Tier 4-5)
